Executive Summary

This report evaluates the employment base, competitive industries, and projected growth opportunities in the Oregon Economic and Community Development Department's (OECD) regional service area made up of Benton, Lane, Lincoln and Linn counties. The following are key features and trends that were identified by the data and analysis in this report:

Employment and Wages

- Employment in the region (201,112) accounts for 14.0% of private sector employment in Oregon (1.4 million).
- Average private sector wages in the region (\$33,218) are 11.9% lower than the state average of \$37,703.
- Lane and Linn counties account for 80.0% of regional employment.
- Benton is the only county for which its average wage was above the state average, exceeding the state average by 6.0%.
- Linn had the highest employment growth in the region and is also the only county in the region where employment growth (6.0%) exceeded the state average of 5.9% between 2004 and 2006.

Interstate Business Moves

- The region was a net importer of business establishments between 1990 and 2004.
- The region had net a gain of business from California, Texas, Georgia, Illinois, Nebraska, New Mexico, Utah and Washington.
- The region had a net loss of business establishments that moved to Arizona, Nevada, Alaska, Idaho, Iowa, Florida, Hawaii and Tennessee.
- Service industry (Business Services & Engineering, Accounting, Research, Management & Related Services) accounted for the largest share of net moves into the region.
- The region's Catering industry (Eating and Drinking places) experienced a net loss of 6 firms over the time period.

Population and Age Demographics

- Population growth in each county of the region was lower than the state average of 3.0% between 2004 and 2006.
- The region had a higher share of retirement workers (17.9%) than the state average of 16.6%.
- Only three industries had a smaller share of retirement workers than the state average: Construction, Information and Leisure & Hospitality.

Competitive Industries

- The region has 55 industries that met at least one of the competitiveness criteria¹.
- Of the 55 competitive industries, 34 are projected to grow by 2016.
- Employment for 22 of the competitive industries is projected to grow faster than the regional average.
- 20 of the competitive industries have average wages above the regional average wage.

¹ Competitive criteria used in this report are as follows: location quotient greater than or equal to 1.25; relative average wage greater than 100%; and differential employment growth rate greater than or equal to 20%.

Introduction

The purpose of this report is to evaluate the employment base, competitive industries and projected growth opportunities in the Oregon Economic and Community Development Department's (OECD) regional service area made up of Benton, Lane, Lincoln and Linn counties. The framework for the report provides data and analysis to help identify emerging issues and possible areas for strategic economic development initiatives. The report is composed of four sections. Section one details the data sources and methodology for this report. Section two provides an overview of the regional economy by analyzing employment, wages, population growth, business relocation, and age demographics by industry. Section three provides a framework to identify the industries in which the region may have a competitive advantage in developing or expanding regional industry specialization. Section four analyzes the employment and occupational growth opportunities that are projected for the industries identified in section three. Detailed tables of business relocation data are provided in the two appendices.

Section 1: Data Sources and Methodology

This report is based on analysis of statistical data from Oregon Employment Department, Bureau of Labor Statistics, Portland State University's Population Research Center, and Walls and Associates' National Establishment Time Series (NETS) database.

The methodology for this report uses a series of indicators to provide a framework for evaluating the competitive strengths and growth opportunities of the regional economy. The following indicators are used for this report.

Regional Indicators

Section two begins with an overview of the regional economy focusing on private sector business establishments, employment, and average wages to determine the geographic distribution and characteristics of employment in the region. This data is followed by recent employment and population growth trends to evaluate the region's strength in creating employment opportunities, and attracting or retaining people in the area.

The next set of indicators in this section examines regional business relocation patterns. One way to evaluate the economic strength of a region is to see if it is able to attract businesses from outside the area. This set of indicators looks at net gain or loss of business establishments by industry and also details the states where business relocations are most likely to occur.

The final set of indicators in this section analyzes of the share of retirement age workers in the region by sector. The impending retirement of the baby-boomer generation will create challenges and opportunities for regional economies. Worker replacement needs may create new employment opportunities, but regions may struggle to find qualified workers.

Competitive Industry Indicators

Section three develops three sets of indicators to identify industries that have a competitive advantage in the region. We examine employment concentrations, relative wage levels and differential growth rates within each region to identify industries that appear stronger in the region than elsewhere in the state. This section of the report uses the same competitiveness indicators as Joe Cortright's "Oregon Industry Clusters" report commissioned by OECDD. More information about the each of the three competitiveness indicators is listed below:

One characteristic of a competitive industry is the concentration of industry employment in a region, which is measured using location quotients. Location quotient is a ratio of the employment concentration of a given industry in a region compared to that industry's employment concentration in the state as a whole. Location quotients above one indicate that an industry's share of employment in the region is greater than the industry's share of employment statewide. For this study we use a location quotient threshold value of 1.25 to determine if an industry has a competitive advantage in the region. A location quotient of 1.25 means that an industry has a 25 percent greater employment concentration in the region than that found in Oregon as a whole.

Another competitive indicator is relative average wage. Regions where industry average wages are significantly above the state average are one sign that the industry has a competitive advantage in the region. Firms generally pay higher wages to higher skilled workers, as a reflection of their higher productivity, greater level of human capital, or to compensate them for the maintenance of firm specific skills. To measure relative average wage we compare industry average annual pay levels for the region and for Oregon in 2006. The threshold for this indicator is 100%, which indicates that the average annual pay in the region is equal to or greater than the state average for that industry.

Differential employment growth rate is the final indicator that was used to determine regional industry competitiveness. If a region's industry consistently outperforms their peers statewide over a period of time this may indicate the existence of a competitive advantage for that industry. To measure differential growth, we examine five-year growth rates for regional and statewide industry employment. The threshold for the relative growth indicator is 20%, which means employment in the industry grew at least 20% faster in the region than it did in the state as a whole.

Employment Growth Projections

Section four looks at the employment growth projections that are associated with each of the regionally competitive industries identified in section three. Growth projections are a good way to determine the industries where employment growth is projected to occur. Current projections cover the period from 2006 to 2016.

Caveats & Limitations

The competitive industries indicators and the employment projections are based on different datasets. The competitive industries indicators are based on private, covered (subject to unemployment insurance) employment while the employment projections are based on non-farm covered and uncovered employment. As a result the employment figures in Table 7 do not match the employment totals in Tables 8 although they are typically very similar.

Section 2: Overview of the Regional Economy

Business Establishments, Employment and Wages

- The region made up of Benton, Lane, Lincoln and Linn counties accounts for 14.0% of Oregon's private sector employment.
- Average private sector wages in the region are 11.9% lower than the state's private sector average wage.
- Benton is the county that has the highest average wage in the region and is higher than the state average wage.
- In this region, Lincoln County ranks at the bottom for average wage and share of employment.

Table 1: Private Sector Establishments, Employment and Wages, 2006

Area	Est.	Employment	Average Wage	% of Region Employment	% of Region Avg. Wage
Benton	2,230	26,425	\$40,070	13.1%	120.6%
Lane	10,425	125,191	\$32,330	62.2%	97.3%
Lincoln	1,711	14,269	\$26,276	7.1%	79.1%
Linn	2,818	35,227	\$34,045	17.5%	102.5%
Region	17,184	201,112	\$33,218	100.0%	100.0%
Oregon	122,629	1,434,040	\$37,703	N/A	N/A

Source: OECD analysis based on QCEW data from the Oregon Employment Department and BLS

Employment and Population Growth

- In all but Linn County, employment growth in the region was lower than the state's employment growth rate (5.9%).
- Linn and Lane counties were in the top half of all Oregon counties (36) in employment growth from 2004 to 2006.
- All the counties in the region had positive growth in both employment and population.

Table 2: Percentage Change in Employment and Population, 2004-2006

Area	Employment	Population	Emp. Growth Rank	Pop. Growth Rank
Lincoln	2.6%	0.3%	24	27
Benton	1.6%	2.9%	29	9
Linn	6.0%	1.8%	11	17
Lane	5.7%	1.9%	13	16
Oregon	5.9%	3.0%	N/A	N/A

Interstate Business Moves

- The region was a net importer of business establishments between 1990 and 2004.
- California was the top feeder state for the region between 1990 and 2004; the region received 120 net establishments from the state.
- This region had 9 establishments leave for both Arizona and Nevada.

Table 3. Top Feeder States (1990-2004)

State	Net Est. Gain
California	120
Texas	8
Georgia	6
Illinois	6
Nebraska	5
New Mexico	5
Utah	5
Washington	5

Table 4. Top Stealer States (1990-2004)

State	Net Est. Loss
Arizona	-9
Nevada	-9
Alaska	-7
Idaho	-6
Iowa	-4
Florida	-3
Hawaii	-3
Tennessee	-3

Source: OECD analysis using National Establishment Time Series Database (Wall and Associates)

- The most establishments gained by the region were from the Business Services industry (30).
- The Engineering, Accounting, Research, Management & Related Service industry accounted for the largest share of net out-of-state moves from the region.

Table 5: Largest Net Establishment Gains by Industry (1990-2004)

Industry	Move In	Move Out	Net Change
Business Services	62	32	30
Miscellaneous Retail	38	20	18
Engineering, Accounting, Research, Management & Related Svcs	50	42	8
Industrial and Commercial Machinery and Computer Equipment	13	6	7
Construction - Special Trade Contractors	22	16	6
Chemicals and Allied Products	8	2	6
Home Furniture, Furnishings and Equipment Stores	10	4	6
Automotive Repair, Services and Parking	7	1	6
All	457	341	116

Source: OECD analysis using National Establishment Time Series Database (Wall and Associates)

- The region's largest net loss occurred in the Eating and Drinking Places industry.
- Agricultural Production (Livestock & Animal Specialties) and the Forestry Industry experienced no business relocation into the region.

Table 6: Largest Net Establishment Losses by Industry (1990-2004)

Industry	Move In	Move Out	Net Change
Eating and Drinking Places	3	9	-6
Agricultural Production - Livestock and Animal Specialties	0	4	-4

Age Demographics by Industry

- The number of retirement age workers is highest in Educational & Health Services and Manufacturing respectively.
- Natural Resources & Mining is the only industry in which the share of retirement age workers is lower than the statewide average.
- Almost one third of Transportation & Utilities sector workers are at retirement age.
- The transportation sector had the highest percentage of retirement age workers (26.9%), when compared to all the sectors in the region.
- The information industry has the fewest number of retirement age workers but Leisure & Hospitality has the lowest percentage of retirement workers.

Table 7: Age Demographics by Industry, 2006

Sector	Statewide			Region		
	Age 14-99	Age 55+	Pct.	Age 14-99*	Age 55+*	Pct.*
Construction	100,444	13,498	13.4%	12,581	1,919	15.3%

Source: Oregon Employment Department, Local Employment Dynamics

* Some sector totals are affected by confidentially restrictions due to the small size of sector employment in the some of the counties that make up the region

Section 3: Regional Competitive Industries

- Of the 93 reportable (non-confidential data) 3-digit NAICS industries in the region, 55 met at least one of the competitiveness criteria.
- Employment in these industries accounts for 64.3% of private employment in the region.
- Machinery Manufacturing is the only industry that meets three competitiveness criteria.
- More than half of the regions competitive industries have regional employment concentration ratios that are less than the state as a whole.
- The highest employment concentration in the region occurs in Chemical Manufacturing, which is almost two times the concentration of the state as a whole.

Table 8: Industries Meeting At least One of the Competitiveness Criteria (sorted by employment)*

NAICS	NAICS Description	Est.	Employment	Average Wage	L.Q.	Relative Wage	Diff. Growth Rate	# of Criteria Met

Competitive Industries: Employment Projections by Industry

- Of the competitive industries in the region, 48 are projected to grow between 2006 and 2016.
- 15 of the competitive industries are projected to grow faster than the regional average of 13.3%.
- Machinery Manufacturing, which has three competitiveness criteria, is expected to grow less than the regional average for 2006 to 2016.
- Ambulatory Health Care Services, Nursing & Residential Care Facilities and Internet Publishing & Broadcasting are expected to grow fastest, all though they only meet one competitiveness criteria.

Table 9: Competitive Industry Employment Growth Projections (sorted by % change)*

NAICS	Industry	2006	2016	Change	% Change
621	Ambulatory Health Care Services	8,797	11,855	3,058	34.8%

Source: OECD analysis based on CES data from the Oregon Employment Department

* Employment totals in Table 8 vary from those in Tables 9, and 10 because they are from different data sources. Table 8 uses covered employment (gathered from firms that pay unemployment insurance) from the Quarterly Census of Employment (QCEW) and Wages. The employment projections in Table 9 and 10 are based on Current Employment Statistics (CES) that include both covered and uncovered employment.

Top 15 Regionally Competitive Industries
